

INTERALTER Single Member P.C.

From Human 2 Machine Interaction

To the integration of Machine 2 Machine communication

For an Holistic Information Environment

INTERALTER provides IT consultancy, software design and development, customized integration services and hardware deployment and maintenance to Environment, Health, Education verticals, in an ethical economy framework.

Our know-how & 30 man-years of experience in Research and Technology development constitute our advantage in the market.

INTERALTER augments its business solutions portfolio in parallel with R&D in ICT sector towards new business processes. As a value-added systems integrator, we provide qualitative end-to-end solutions for our customers' needs.

We are at the forefront of e-healthcare innovation, providing a comprehensive suite of platforms and solutions that leverage IoT, wearables, big data, smart devices, and cloud services. Our e-healthcare offerings enhance patient care, streamline healthcare delivery, and improve overall well-being with real-time data monitoring for informed swift decisions, continuous health tracking of patients, big data analytics for personalized treatment via smart devices and secure cloud services, providing patients and healthcare providers with access to critical information anytime, anywhere.

Being dedicated to ethical economy, we leverage our software development expertise to drive environmental sustainability. Our eco-conscious research and offerings are tailored to positively impact the environment. From sustainable energy management platforms to innovative eco-tourism IoT-based systems connecting travelers with responsible and sustainable options. We also promote environmental awareness through interactive educational platforms, along with applications and tools for preserving and managing natural habitats, safeguarding biodiversity.

We specialize in creating tailor-made e-learning solutions for businesses, individuals, educational institutions, and organizations of all sizes. Our comprehensive education and training services encompass all aspects of e-learning and m-learning from enhanced content development and learning management systems like Moodle, Canvas, and Blackboard, to modern, user-friendly and interactive multimedia elements and seamless user experiences. We understand the unique needs of our clients and ensure that our sustainable offerings not only meet but exceed their expectations.

Within the IT sector, we are committed to fostering a more sustainable and ethical future. Our services encompass a range of sustainable software solutions designed to reduce energy consumption and promote eco-friendly practices. We also develop socially responsible applications that support charitable causes and ethical sourcing, and our dedication to data privacy ensures that our software respects ethical data handling practices. We advocate for green computing solutions, promoting energy-efficient data management. Our software empowers ethical marketplaces by connecting consumers with products and services that meet specific ethical and sustainability criteria.
